CMT The Perfect 10!
Rated the #1 Overall Router Bits

Superior High-Strength Steel

We use high-quality, solid bar stock sourced from Switzerland, which provides exceptional resistance to fatigue and abrasion.

Anti-Kickback Design

Controls depth of cut and minimizes the chance of kickback, reducing your risk of injury.

Sinterhip Hi-Density Industrial Chrome Carbide™

New process called SinterHIP (Hot Isostatic Pressing), helps prevent material failure and increases cutting life.

Tri-Metal Brazing

Our Silver-Copper-Silver brazing protects the carbide tip when cutting harder wood or wood composites and reduces the chance of failed welds.

Non-Stick Orange Shield Coating™

Prevents bit from heating up, reduces pitch build-up, protects against corrosion and provides a longer bit life.

Multi-Axis Grinding creates a 3X Longer Lasting Mirror Finish

Each cutting edge is precisely sharpened to the micron, in order to produce a cutting angle, which is razor sharp, yet extremely durable.

The Orange Router Bit Collection

Our 140 Most Popular Bits
